CR²O BV AND VIROCLINICS BIOSCIENCES BV

We believe that

It is time to **challenge the current dogma** of how biopharmaceutical companies are engaging CRO's and consultants. Ad hoc vendor selection to address important questions during the product development lifecycle leads to an unnecessarily fragmented and disconnected approach to R&D.

There is an opportunity to **offer more value to clients** by combining expertise into integrated project teams, dedicated to realizing accelerated preclinical and clinical development of drugs, biologicals, vaccines and diagnostics targeting viral infectious diseases.

The unique synergy between CR²O's clinical trial services and Viroclinics' operational virology capability, combined with access to an extensive network of external key advisors creates a powerful, all-inclusive service platform covering the **full spectrum of development stages** of pharmaceutical targets.

From early clinical development strategy to pricing and reimbursement negotiations and commercial transactions, the alliance of CR²O and Viroclinics allows the **design and execution of robust and customized data packages** to address individual client needs.

"We are delighted to be able to work more formally with the team at CR²O. They have great credibility in

the market and when combined with the unique virology capabilities and expertise of Viroclinics Biosciences, we believe that through our partnership we offer customers the most comprehensive and exciting range of development services available in the virology field. We can support our biopharmaceutical customers with the best virological knowledge available and provide them with integrated and optimally customised development programs and project solutions."

*Dr Bob van Gemen
CEO of Viroclinics Biosciences*

"We are excited to formally join forces with the successful Viroclinics team.

Biopharmaceutical companies now can turn to the CR²O and Viroclinics Biosciences alliance to develop and implement their preclinical, clinical and regulatory strategies when developing therapeutics, vaccines and diagnostics for viral infectious diseases.

We will combine our scientific expertise and operational excellence to meet unmet medical needs in the virology field."

*Hadil Es-Sbai MSc.
CEO and co-Founder of CR²O*

About CR²O BV

CR²O is a recently established research organization co-founded by Profs Ab Osterhaus and Eric Claassen, that focusses on managing and operating clinical trials for vaccine-, drug-, and diagnostics development by industry and public organizations. CR²O closely collaborates with leading clinics and research centers in Europe.

CR²O will offer the combined strengths of its affiliated centers as an overarching cutting edge service provider.
